Too Deferential to "Prosperous and Privileged Folks," Says E. S. Lines.

Immediate steps to remove from the Protestant Episcopal Church the suspicion of "deference to prosperous and privileged folks," closer relations with other churches and a clargy who not only know how to use their prayer books but how to conduct a prayer meeting were urged last night by Dishop E. S. Lines of Newark as necessary to a re-

ligious reawakening. The radical utterances of Bishop lines created a stir among the cierical and lay deputies attending the Synod of the Province of New York and New lersey, which began a three days meeting at Synod Hall, Amsterdam avenue and 110th etreet, last night. Goodrich Tíres Plough Leagues of Mud Free from Tire Trouble

Wear out 3 sets of Chains

HROUGH spring and summer, Goodrich Test Car Fleets in every region of our land have demonstrated the lasting strength of Silvertown Cord and Black Safety Tread Tires on any kind of a road in any sort of weather. Hundreds of thousands of miles of mauling these matchless fabric tires under The Test Car have proved their right to the title, "America's Tested Tires."

Yet the TEST of Tests, which out-tested the Goodrich Test Car Fleets, came to them unscheduled and unplanned. The San Francisco Ad Club set forth with a Caravan of automobiles to motor cross continent to the St. Louis Advertising Convention. The pilot car was equipped with four Goodrich Black Safety Tread Tires.

At the Sierra Nevadas, the pleasure jaunt, by a whim of weather, turned to the bitterest test of tires, rain and snow and storm-strickened roads ever staged. With

storm skies over the Caravan always, and rain storm and snow storm whipping fore and aft, that pilot car fought its way over the desert, the Rockies and the Prairies.

It plowed those four Goodrich Tires through the slush and snow, the scattered rock and frozen mud of water guttered trails on desert and mountain. Even the flat lands, those tires waded tarlike mud, sank into quagmires, and forded flood-swollen streams.

The pictures here, reproductions of photographs -the hub-mired car and wheels clogged with clay-tell what those tires endured.

All four tires, unscathed, reached a point fifty

miles from St. Louis. Here one fell a victim to a puncture, but the others wheeled into St. Louis on San Francisco air. The tire-trying test wore out three sets of chains, but not those four Goodrich Tires.

This dramatic demonstration but confirms what

Goodrich Test Car Fleets are demonstrating always in widely separated regions of our country; the durability of "America's Tested Tires" BLACK SAFETY TREADS AND SILVERTOWN CORDS.
